Kyle Reiling

Executive Director, Industrial Development

Greenview Industrial Gateway

MD of Greenview

Re: Greenview Industrial Gateway- Public Lands Act Indigenous Consultation

Mr Reiling,

Please accept this letter as confirmation that on August 20, 2021, adequacy decisions were made by the department regarding the crown led indigenous consultation efforts under the Public Lands Act for the Greenview Industrial Gateway (formerly Tri-Municipal Industrial Partnership). Consultation was conducted for the purpose of taking up the lands associated with the Greenview Industrial Gateway for future sale to or development by the MD of Greenview. Through this process, four communities were consulted with, and adequacy decisions communicated with each. See attached letters.

Subsequently a land reservation was placed on the land identified in the Area Structure Plan (protective notation PNT190055) for the purpose of guiding development of the lands. Please see the attached document which describes the reservation in more detail. As the department updated its reservation process, the protective notation was updated to a Crown Land Reservation (CLR 220042) and is still in place.

Unless otherwise directed, development applications made under the Public Lands Act by the MD of Greenview within the Greenview Industrial Gateway lands as identified in the Area Structure Plan, should be submitted with this information to ensure a duplication of indigenous consultation efforts does not occur.

Thanks,

Andrew Goldberg

Director, Integrated Lands Delivery NW

Lands Operations Division
